PROJECT MANAGEMENT

# Plan the work. Track it to done.

TaskFlow is a project and task management web application. Teams use it to organise projects, assign tasks, follow deadlines and see where the work stands, with access controlled by each person's role.

Sign in Create account

Accounts are created by an administrator, or you can register and confirm your e-mail address with a one-time code.

## What you can do with TaskFlow

### Projects and milestones

Plan a project with dates, a team and milestones, and follow its progress from one page.

### Tasks, subtasks and checklists

Break work into tasks with priorities, assignees, due dates, subtasks, checklists and dependencies.

### Board and calendar

Move cards across a Kanban board, or see due dates and milestones by month, week or day.

### Roles and approvals

Project roles decide what each person may do, and finished work can go through a review and approval step.

### Notifications and deadlines

Get notified about assignments, approvals and mentions, with reminders before a deadline and notices when work is overdue.

### Dashboard and reports

See due and overdue work, delayed projects and team workload at a glance, and export reports.

## About this service

TaskFlow is run by Sovannarith. Read how personal data is handled in the Privacy Policy and what is expected of everyone who uses the service in the Terms of Service. Questions can be sent to sovannarithnao@gmail.com.
