1. Who we are

TaskFlow is a project and task management web application available at https://www.task-flow.lat. It is operated by Sovannarith (“we”, “us”). This policy explains what personal data the application handles, why, who else receives it, and what you can ask us to do with it.

2. What we collect

Account details (name, username, e-mail, a password hash and optional profile fields such as phone, photo, position and department), the project content you add, activity and notification history, administrator audit entries, sign-in sessions and one-time codes. The browser stores only your sign-in username and role, your theme and your last-activity time. There are no analytics or advertising scripts.

3. Who can see your information

Administrators, yourself, and people who share an active project with you. Profile photos are served from an unguessable public address.

4. Service providers and third parties

Vercel (front end), Render (back end), Neon (database, Singapore region) and Google (fonts, the optional Google sign-in, and the Gmail API used to send e-mail).

5. Google sign-in and Google user data

Optional. We keep Google’s account identifier and verified e-mail to link your account; the Google name becomes the full name of an account Google creates. Disconnecting or deleting the account removes the link. The profile picture is not read.

6. How we protect it

Passwords are hashed with BCrypt, a 15-minute access token and an httpOnly refresh cookie keep you signed in, idle sessions end, permissions are checked on the server, and repeated failed sign-ins are locked out.

7. How long we keep it, and deletion

Deleting an account removes its profile, memberships, assignments, comments, time entries, notifications, sessions and codes. Tasks, files and activity entries it created are kept without the link to the person.

8. Your choices

You can ask us to give you access to your data, correct it, or delete it.

9. Changes to this policy

When the behaviour of the application changes in substance, this text and the date above are updated together.

10. Contact
