Help & Support

Answers to common questions

Getting started

How do I create a task?
Press New Task on the Tasks page or the Kanban board, or Add Task inside a project.

How do I change my password?
Open Profile and use the Password card.

How do I set my position and department?
Pick them in Personal Information on your Profile.

How do I switch the theme?
Open Settings and choose Light, Dark or System.

Projects and team

Who can create projects and tasks?
Projects: people who hold the create-project right (the Administrator and Project Manager roles). Tasks: where your role in that project allows it.

How do I add someone to a project?
Use Add Member on the Team page, or Add member on the project page.

Troubleshooting

I see “Not found” or “No access”
TaskFlow shows the same page for a missing and an off-limits address, so nobody can probe which projects exist. Ask a project owner or your administrator.

Still stuck?

Ask your workspace administrator.
